

## Dear Future Geometry CP Student,

In order to ensure you are prepared for Geometry, the math department has designed a summer review of math skills and concepts. The assignment is entirely online and can be accessed through the website DeltaMath at <u>www.deltamath.com</u>. Directions to create an account and/or add the summer course to an existing account are on pages 2 and 3 of this file. You will need to enroll in the course with the following information:

Teacher Code: 554927

## Course Name: Geom CP Summer Assignment 2021

You can join the course at any time, but you will not be able to access the actual assignment or assignments until July 1<sup>st</sup>. The assignment must be completed by August 22<sup>nd</sup> at 11:59 PM. There is a Student Help Video which can be accessed by using the link in the top right of the home screen. Most questions have a show example button available if you need a refresher on how to complete a particular type of problem. Some problems have a video tutorial as well. You do not have to complete all questions in one session but you should save after each session. You can access the assignment as many times as you would like until the due date. The grade on this assignment will count towards your first semester grade in your Geometry course.

All content in the assignment is a review of previous math curriculum. The goal of the assignment is to refresh those skills so you are prepared to begin Geometry. Please use the resources on DeltaMath to refresh your knowledge and skills. Your score on this assignment will count into your semester 1 grade. If you have questions during the summer, email Mrs. Enochs or Mrs. Diehl at the address below.
