Chemistry CP Summer Assignment

Welcome to Chemistry at MND!

Chemistry has its own language in symbols and formulas. It is important that you memorize these symbols for the elements in the table below as they will be used throughout the school year. You will encounter quizzes early in the year based on this study sheet. You should be able to give the correct spelling given the symbol or the correct symbol given the name.

You might make flashcards to help you memorize the proper spelling of the elements and their symbols. Study with a friend or family member. Learning is easier when you say it out loud and write it down often. Make a list of the elements and see if you can get all the symbols correct. Then make a list of the symbols and see if you can spell their names correctly. The more often you work the list, the easier it will be to memorize them all.

If you have any questions concerning this assignment email any of the Chemistry teachers below.

Have a good summer. We look forward to having you in class.

Common Elements

Aluminum	Al	Lead	Pb
Argon	Ar	Lithium	Li
Barium	Ba	Magnesium	Mg
Beryllium	Be	Manganese	Mn
Boron	B	Mercury	Hg
Bromine	Br	Neon	Ne
Cadmium	Cd	Nickel	Ni
Calcium	Ca	Nitrogen	N
Carbon	C	Oxygen	O
Chlorine	Cl	Phosphorus	P
Chromium	Cr	Potassium	K
Cobalt	Co	Silicon	Si
Copper	Cu	Silver	Ag
Fluorine	F	Sodium	Na
Helium	He	Strontium	Sr
Hydrogen	H	Sulfur	S
Iodine	I	Tin	Sn
Iron	Fe	Zinc	Zn
